Functions assign outputs to inputs. Some functions have simple rules, like "for every x , return x^2 ." However, there can be other rules that are more elaborate. For example, "If $x < 0$, return $2x$, and if $x \geq 0$, return $3x$." These are called *piecewise functions*, because their rules aren't uniform, but consist of multiple pieces. A piecewise function is a function built from pieces of different ...
