3D Printing vs. CNC machining | 3D Hubs

CNC is a faster solution than 3D printing. Automated CNC machines can work around the clock as long as they're properly maintained. A project that could take CNC machining an hour would equate to a 3D printer taking hours to get the final product because it has to build the product layer by layer.

3D Printing and CNC Fabrication with SketchUp - Civil ...

3D printing has very few geometry restrictions compared to CNC. Support structures are required in most technologies, like FDM or SLM/DMLS, and are removed during post processing. Plastic freeform, organic geometries can be easily manufactured with polymer-based powder bed fusion processes, such as SLS or Multi Jet Fusion (MJF) , as they require no support.
