7-1 Exponential Functions, Growth, and Decay The base of an exponential function indicates whether the function shows growth or decay. Exponential function:  $f(x) = a \cdot b^x$  • a is a constant • b is the base. The base is a constant. If  $0 < b < 1$ , the function shows decay. If  $b > 1$ , the function shows growth. • x is an exponent.
