2014 GMC SIERRA 1500 5.3L V8 Radiator | RockAuto

A coolant change involves simply draining the coolant at the bottom of the radiator, then topping up the radiator with fresh fluid until it's full. Alternatively, the technician can remove the drain plugs on the engine block, which lets all the coolant drain out of the engine and cooling system components, and then top up with new coolant.

How to Drain Fill and Bleed Coolant 88-98 GMC K1500 V8 5.7L

GMC Sierra Cooling System There are parts of this country with high elevations. High elevations mean a steep climb up and high temperatures when you get there, both of which tax your engine, especially when you're towing any weight. And, trust us, once you've been on the business end of a mechanic's bill due to engine damage, you'll do anything ...
