noun. 1. with regard to psychology, the conflict of differing or contrastive feeling-based or inspirational drives in the same person. 2. with regard to psychoanalysis, the battle between unaware and aware drives, particularly between the superego, ego, and the id, which is thought to be a huge reserve of neuroses. 2. with regard to interpersonal communications, the argument, conflict, and ...

A Dictionary Of Human Oncology

A. "hem" means blood, it's a very common bruise - when you fall off your bicycles, you get hit. if you don't cut yourself too in the process- blood vessels usually get ripped and blood flows to that area. this causes a red/blue color. after a couple of weeks it'll change color to green and then yellow. this is the blood cells disintegrate.
