### Laundry & Cleaning | Kao Chemicals Europe

Detergents, as we have learned so far, consist of surfactants and chelating agents. Remember, surfactants remove dirt from a soiled surface and chelating agents are used to surround unwanted metal ions found in cleaning solutions. The chelating process, though very effective, is not always necessary and adds to the cost of formulating detergents.

### Formulary, Formulation, Formulas Handbook (Chemicals ...

General purpose detergents are suitable for all washable fabrics. Powders are especially effective in lifting out clay and ground-in dirt. Liquids work best on oily soils and for pretreating soils and stains. Light duty detergents are used for hand or machine washing lightly soiled items and delicate fabrics. Cake or detergent bars are used.
