Much of its collection was seeded by Project Gutenberg back in the mid-2000s, but has since taken on an identity of its own with the addition of thousands of self-published works that have been made available at no charge.

## **Understanding the Academic Context of Your Topic ...**

Context is something we've been thinking a lot about at ScienceOpen recently. It comes from the Latin 'con' and 'texere' (to form 'contextus'), which means 'weave together'. The implications for science are fairly obvious: modern research is about weaving together different strands of information, thought, and data to place your results into the context of existing research.
