Drugs used in anaesthesia - WHO archives

Per Medicare Anesthesia Manual
"Anesthesia time begins when the anesthesiologist starts to prepare the patient for the procedure. Normally, this service takes place in the operating room, but in some cases, preparation may begin in another location (i.e., holding area). Anesthesia time is a continuous time period from the start of

Anesthesia Drug Manual | Anesthesiology | ASA Publications

The drug goes in via the lungs! • The drug concentration everywhere rises asymptotically to the inspired partial pressure! • The partial pressure at equilibrium is the same in all tissues, provided the drug enters and leaves via the lungs! • The fastest rate of rise is in the alveolus. This is rate limiting for all other tissues!

Medicare Claims Processing Manual

Anesthesia is the practice of administering medicines that block the feeling of pain or other sensations to allow medical or surgical operations to take place without causing undue distress or discomfort. There are various types of anesthesia, and most are given by inhalation (breathing in through the nose and mouth) or injection.
