Suction Assisted Protein Lipectomy | Dr. Jay Granzow
Suction lipectomy is a procedure which removes fat cells through small incisions utilizing surgical suction catheters. The goal of surgery is to improve body contour by removing localized accumulations of fat. This will establish more normal proportions between various areas of the body and improve the appearance both in and out of clothing. Suction lipectomy is not a treatment for generalized ...

Atlas of Suction-Assisted Lipectomy in Body Contouring ...
Suction-assisted lipectomy Suction-assisted lipectomy (SAL) is currently our first-line operative intervention for lymphedema because of its superior efficacy, consistent results, and low morbidity. 30, 57, 100-106 This technique removes the hypertrophied, subcutaneous adipose tissue present in chronic lymphedema.

Liposuction: Uses, benefits, and risks
Danilla et al (2013) examined if suction-assisted lipectomy (SAL) decreases the incidence of early cardiovascular disease risk factors or its biochemical and clinical risk indicators. A systematic review of the literature was performed by conducting a pre-defined, sensitive search in MEDLINE without limiting the year of publication or language.

Suction Lipectomy | Cooper University Health Care
Suction-assisted lipectomy: Another name for liposuction, the surgical removal of fat deposits from specific parts of the body, the most common being the abdomen (the "tummy"), buttocks ("behind"), hips, thighs and knees, chin, upper arms, back, and calves. The technique breaks up and "sucks" fat out of the body through a cannula (a hollow instrument) inserted subdermally (under the skin) thanks to a strong high-pressure vacuum that is applied to the cannula.

Abdominoplasty, Suction Lipectomy, and Ventral Hernia ...
UAL is sometimes used in place of suction-assisted liposuction (SAL). While SAL is the oldest and most tried-and-true version of this surgery, it has some limitations that UAL seeks to fill.
