The Cessna 400, marketed as the Cessna TTx, is a single-engine, fixed-gear, low-wing general aviation aircraft built from composite materials by Cessna Aircraft. The Cessna 400 was originally built by Columbia Aircraft as the Columbia 400. From 2013, the aircraft was built as the Cessna TTx Model T240. Cessna 400 production was ended in February 2018.

The Navomatic 400A manual describes how a VOR radial is intercepted and this Flightgear simulation simulates that. When the course deflection is greater than 10 degrees (full scale on the CDI), the autopilot will turn to intercept at 45 degrees. When the deflection goes below 10 degrees, it will fly a smooth arc intercept to the radial.

I am looking at the G switch but my installation manual for the 400B is dated 1976 when the G switch was not yet added. My T210M dates 1977. Question :does anybody can provide me with the part of the manual concerning the G switch ? or anybody has the drw of the connector from the A/P to the G switch ?

**Cessna 400 Autopilot Manual**  
The 400, unlike the 200 and 300, is a position-based autopilot that used a vacuum-based artificial horizon for roll and pitch sensing. The original 200, 300 and 400 (not to be confused with the "A" versions below) are not repairable in most cases, and to do so would be throwing good money away.

When I was shopping for a 400 series Cessna, I personally avoided any airplane with the original Cessna autopilot. The plane finally purchased has a King KFC 225, which is digital, and attitude based. Second choice would be the STEC 55X. I hear that the King KFC 200 is a good autopilot too.

The ARC Navomatic 300A Autopilot . Please note its operation highlighted in "blue" below: The ARC 300A was an option on many single engine Cessna aircraft available near the mid-seventies and stayed on the option list up through the T210L. Cessna 172M, 180j, 182P, TU-206F, these are but a few aircraft that had the 300A on their option list.
