Ordering Numbers - dadsworksheets.com

Comparing Decimals. Given 2 decimals, it is fairly straightforward to compare them and decide which is greater or lesser when the same number of digits are involved. e.g $.7 > .3$ or $.67 < .92$. Many students have a problem though when the number of digits is different. e.g. comparing $.3$ and $.27$. This is because they, thinking about whole numbers, relate more digits to bigger numbers.
