Here, based on various summaries of Darwin's life and work, is my attempt to think about how Charles Darwin, the ultimate heterodox scholar, would have scored on a measure of the Big Five.

### **Marx and Engels...and Darwin? | International Socialist Review**

In 18th and 19th century natural theology, adaptation was taken as evidence for the existence of a deity. Charles Darwin proposed instead that it was explained by natural selection. Adaptation is related to biological fitness, which governs the rate of evolution, as measured by change in gene frequencies.

### **The Essential Darwin by Charles Darwin - Goodreads**

On the Origin of Species (or, more completely, On the Origin of Species by Means of Natural Selection, or the Preservation of Favoured Races in the Struggle for Life), published on 24 November 1859, is a work of scientific literature by Charles Darwin which is considered to be the foundation of evolutionary biology.

### **Adaptation - Wikipedia**

Darwinism is a theory of biological evolution developed by the English naturalist Charles Darwin (1809–1882) and others, stating that all species of organisms arise and develop through the natural selection of small, inherited variations that increase the individual's ability to compete, survive, and reproduce. Also called Darwinian theory, it originally included the broad concepts of ...
