### Deforestation Trends in the Congo Basin - World Bank

Deforestation rates in the Congo Basin — historically lower than in the Amazon and southeast Asia — are on the rise, particularly in the Democratic Republic of Congo (DRC). The DRC lost the second-largest area of tropical primary forest of any country on Earth (after Brazil) in 2018, according to data on Global Forest Watch.

### Congo Basin Deforestation Threatens Food and Water ...

The Congo Basin forests have been mainly “passively” protected by chronic political instability and conflict, poor infrastructure, and poor governance. Congo Basin countries thus still fit the profile of high forest cover/ low deforestation (HFLD) countries. However, there are signs that Congo Basin forests are under increasing pressure from a variety of sources, including mineral extraction, road development, agribusiness, and biofuels, in addition to subsistence agricultural expansion ...

### Deforestation Trends In The Congo

### Deforestation in Africa | WWF

Abstract. This report aims at providing stakeholders with a good analysis of the potential impacts of mining development on the Congo Basin forests. It is one of a series of outputs prepared during a two-year exercise to analyze and better understand the deforestation dynamics in the Basin. It presents the main findings of an analysis of the mining potential in the Congo Basin as well as the global trends in demand of minerals tries to identify ways to reconcile mining ...

### Deforestation Trends in the Congo Basin : Mining

The DRC contains half of Africa's tropical forest and the second largest continuous tropical forest in the world. Because of unrest and economic instability, the Democratic Republic of the Congo has mostly escaped the industrial-scale deforestation that has taken place in other tropical countries such as Brazil and Indonesia.

### Forests - Our World in Data

The report Deforestation Trends in the Congo Basin: Reconciling economic growth and forest protection is the output of a two-year exercise implemented by the World Bank at the request of the COMIFAC (Regional Commission in charge of Forestry in Central Africa) and the highly-forested countries in the Congo Basin (namely Cameroon, Central African Republic, Democratic Republic of Congo Gabon, Equatorial Guinea and Republic of Congo).

### Deforestation low in Congo Basin, but likely to increase ...

Congo Basin: Early warnings point to major forest risk Alarming deforestation trends in the Congo Basin Between 2001-18, the Congo Basin lost more than 22 Mha of tree cover – an area comparable to three soccer fields per minute. W

### Deforestation trends in the Congo Basin : reconciling ...

Congo Basin forest facts. Congo Basin is home to the world's second largest tropical forest. The Congo Basin supports the highest biological diversity in Africa: over 400 mammal species and more than 1,000 bird species. It is the last stronghold for forest elephant, gorilla, forest buffalo, bongo, and okapi.
