For a closed immersion in algebraic geometry, see closed immersion.. In mathematics, an immersion is a differentiable function between differentiable manifolds whose derivative is everywhere injective. Explicitly, *f* : *M* → *N* is an immersion if  : → is an injective function at every point *p* of *M* (where *T* *p* *X* denotes the tangent space of a manifold *X* at a point *p* in *X*).
