A SUSTAINABLE ENERGY - doe.gov.ae

Renewable energy has become economically attractive in the oil-rich United Arab Emirates (UAE). Ramping up renewables to 10% of the country's total energy mix, and 25% of total power generation, could generate annual savings of USD 1.9 billion by 2030 through avoidance of fossil-fuel consumption and lower energy costs.

Middle East Energy | Global Energy Event

Solar power in the United Arab Emirates has the potential to provide most of the country's electricity demand. While being a major oil producing country, the United Arab Emirates has taken steps to introduce solar power on a large scale. However, solar power still accounts for a small share of energy production in the country. Until 2013, there was no operational solar power in the UAE. The country was the 6th top carbon dioxide emitter per capita in the world in 2009, with 40.31 tonnes, but is
