FSI | Fire & Safety Industries

The Training Division is a very important component of department operations. Properly trained, a fire department can control and contain almost any situation with minimal damage and loss of life. Training in fire tactics is important; however, a firefighter must be trained in many other areas in order to control the situations that are encountered in day-to-day operations.

Fire and Rescue NSW

Fire Department connections to building sprinkler and standpipe systems shall be located in accordance with NFPA 13 and/or NFPA 14, on the main entrance side of the building, unless an alternative location is approved by the authority having jurisdiction.

Fire sprinkler system - Wikipedia

A fire hose (or firehose) is a high-pressure hose that carries water or other fire retardant (such as foam) to a fire to extinguish it. Outdoors, it attaches either to a fire engine or a fire hydrant.Indoors, it can permanently attach to a building's standpipe or plumbing system.. The usual working pressure of a firehose can vary between 8 and 20 bar (800 and 2,000 kPa; 116 and 290 psi) while ...
