Biofloc system is a technology in which the materials which are harmful and poisonous to the fish or shrimp are transformed into some protein food. This is basically used in aqua farming when the density of stocking is high with very less exchange of water. This method would be run productively when the tanks used are kept in direct sunlight.

Organic Farmers and Farms of Kerala

Carp fish farming is very profitable and as being a land of river, we have a tradition of fish farming. About 1.3 millions of pond spread throughout the country. Most of them are being farmed in traditional methods. If we try a little we can make more. In the past fish were collected only from natural source but no system used for farming.

Small-scale freshwater fish farming

As the tilapia is a very testy and fast growing fish, so it has a great demand to the fish farmer. It has made a revolution in the field of fish farming. Farming in a modern way of tilapia fish desired income can be made within a short time. Tilapia culture is also a suitable way of earnings for the unemployed people.
