Airline Color Schemes | An encyclopedia of airline ...

USAAF unit identification aircraft markings, commonly called "tail markings" after their most frequent location, were numbers, letters, geometric symbols, and colors painted onto the tails (vertical stabilizer fins), wings, or fuselages of the combat aircraft (primarily bombers) of the United States Army Air Forces during the Second World War. The purpose of these markings was to provide a ...

Flying Colors: Military Aircraft Markings and Camouflage ...

Military aircraft "Roundels" were first used during World War I. At the very beginning of World War I, none of the military aircraft carried national markings. This was a risky situation, since "friendly" troops could easily mistake their own aircraft as being "hostile." To solve this problem, a system of national identifiers was ...

USAAF unit identification aircraft markings | Military ...

I think this is the model of 747 you saw. Your picture isn't clear enough to see the small "tail number" or it could be obstructed by the wing from your point of view. Notice the "tail number" just in front of the horizontal stabilizer and just be...

The Royal Flying Corps (as well as Britain's naval air service) added this roundel to all its aircraft in 1915. These markings remained largely unchanged until the late 1930s. On the eve of the Second World War, the RAF introduced a thick yellow outline to its standard tri-colour roundel, known as the Type A.
