and techniques in depth. FOR610 training has helped forensic investigators, incident responders, security engineers, and IT administrators acquire the practical skills to examine malicious programs that target and infect Windows systems. Understanding the capabilities of malware is critical to an organization's ability to derive

FOR610: Reverse-Engineering Malware: Malware Who ... - SANS

SANS courses are refreshed several times a year to keep them up-to-date with the latest tools and techniques. Some updates are more significant than others. We're excited to share some details about the revisions to the FOR610: Reverse-Engineering Malware course , which debuted in 2014.

Thoughts about Sans FOR610 and GREM : Malware

I had the opportunity to take the SANS FOR610: Reverse Engineering Malware course in Orlando a couple of weeks ago and I wanted to write about my experience with the course. It's no secret that I'm a big proponent of SANS. I've taken SEC 503 and SEC 504 at live events and I also mentor both ...

The GIAC Security Certification Roadmap

What should my next SANS course be? FOR572(GNFA) or FOR610(GREM) I am GCIH and GCFA certified. Currently a level 1 analyst with almost 2 years exp. I want to take the next level and get out of government contracting and work as a consultant or an analyst at a fortune 500 company. Which course would help me more? 12 comments.

Detroit Dave's Raves: Passed the GREM exam

This was the third SANS class I've done in person, and by the fourth or fifth day you can be really wiped out with brain overload. John did a great job keeping the conversation on point, providing real world examples of the material application, and staying engaged with the participants.

My Review of SANS FOR610: Reverse Engineering Malware ...

SANS FOR610 is a popular digital computer forensics course from the Digital Forensics and Incident Response curriculum of SANS Institute. This course explores malware analysis tools and techniques ...

Has anyone here taken the GIAC GREM exam recently ...

FOR610: Reverse-Engineering Malware: Malware Analysis Tools and Techniques ... "FOR610 should be required training for all forensic investigators. It is necessary for awareness, ... who score the highest in the malware reverse-engineering challenge will be awarded the coveted SANS' Digital Forensics Lethal Forensicator coin. Game on!

FOR610: Reverse-Engineering Malware: GREM Malware ... - SANS

"When I saw Lenny Zeltser was teaching the SANS FOR610 course on reverse-engineering malware in Prague this year, I dashed to my boss's office to beg him for approval to attend. The topic is not only very relevant to our work here at i-Force/Cyberforce but was going to be taught by one of the topic's spiritual leaders, so to speak.

GIAC GREM Certification | Reverse Engineering Malware

The materials you receive for the class are beyond enough to pass the GIAC GREM test. SANS FOR610 covers a broader scope of concepts and goes deeper in some areas than what is expected of you on the exam. Lenny Z is in talks with SANS about starting up a more advanced level malware

analysis / RE course, and I'm looking forward to taking it :). _

SANS Digital Forensics and Incident Response Training Courses

The winners are later listed on the SANS Institute's virtual wall of Lethal Forensicator Coin Holders. Holders of the Lethal Forensicator Coins are properly trained incident responders or investigators who sometimes represent the only defense an organization has in place during a compromise or a complex digital investigation. These analysts ...

SANS FOR610 GREM2 - 2015 - LEARNING FOR LIFE

Thoughts about Sans FOR610 and GREM (self.Malware) submitted 10 months ago by [_Queen_Mags_](#) Hi everyone, I have a bit of a dilemma. I'm thinking about doing the FOR610 course and sitting the GREM exam at the end of it but I have to say I am scared to even register :)
