Foundation Engineering is an Oregon-based consulting firm that has provided geotechnical design and construction monitoring services since 1982. Our team is an authority on the unique geotechnical and geological properties of the Pacific Northwest.

### **Foundation Engineering**

In engineering, a foundation is the element of a structure which connects it to the ground, and transfers loads from the structure to the ground. Foundations are generally considered either shallow or deep. Foundation engineering is the application of soil mechanics and rock mechanics (Geotechnical engineering) in the design of foundation elements of structures.
