The later part of Brouwer's career contains some controversial episodes. He had been appointed to the editorial board of Mathematische Annalen in 1914 but in 1928 Hilbert decided that Brouwer was becoming too powerful, particularly since Hilbert felt that he himself did not have long to live (in fact he lived until 1943). He tried to remove ...

(The article happens to mention the Brouwer-Hilbert controversy but only in a footnote). protonfish 8 months ago. That essay is a significant source of belief in the myth of inherent mathematical truth, but it has flaws and is far from proof. It focuses on cherry-picked phenomena that are easily represented by simple math, but ignores those ...

The Hilbert-Brouwer controversy resolved? Per Martin-Löf Since this lecture is called the Beth lecture, it is natural to ask oneself: what connection is there between Beth and intuitionism? and, to my mind, the most obvious answer is: the Beth models for intuitionistic propositional and predicate logic.

Indeed, Hilbert lost his "gifted pupil" Weyl to intuitionism: "Hilbert was disturbed by his former student's fascination with the ideas of Brouwer, which aroused in Hilbert the memory of Kronecker." Brouwer the intuitionist in particular objected to the use of the Law of Excluded Middle over infinite sets (as Hilbert had indeed used it).

1909 Meets Hilbert in the Dutch seaside resort of Scheveningen. Brouwer much admires Hilbert and describes their meeting in a letter to a friend as "a beautiful new ray of light through my life" (Brouwer & Adama van Scheltema, 1984, p. 100). Twenty years later, Brouwer's relation with Hilbert would turn sour.

It is this adoption of "completed infinity" as applied to Hilbert's 2nd problem that Brouwer complains about. The exact mechanism of the use of this is embedded in Hilbert's axioms. Kolmogorov discusses in detail Hilbert's "first axiom of negation" and his "second axiom of negation"
