## **Full Stack Javascript Development With**

While to operate with the LAMP package a full stack engineer needs to know a few languages, it's not always the case with full stack development. JavaScript alone can be used across all software layers. Therefore, a person who applies the language for both front end and back end programming is called JavaScript full stack developer. Taking into account the undisputed popularity of the programming language, such engineers are probably the most sought-after specialists in web development.

## **Full Stack Javascript Developer Jobs, Employment | Indeed.com**

At its core, Init takes advantage of the 'full-stack JavaScript' paradigm (some people refer to it, or a subset of it, as the MEAN Stack). By working with such a stack, Init is able to use just a single language while creating an incredibly flexible and fully featured environment for developing web apps. In short, Init lets you use JavaScript not only for client and server development, but also for building, testing, templating, and more.
