What Is a Psychosexual Disorder? (with pictures)

Gender dysphoria (GD) is the distress a person feels due to a mismatch between their gender identity and their sex assigned at birth. People who experience gender dysphoria are typically transgender. The diagnostic label gender identity disorder (GID) was used by the DSM until it was renamed gender dysphoria in 2013 with the release of the DSM-5. The diagnosis was renamed to remove the stigma ...

(PDF) Gender Identity Disorder and Psychosexual Problems ...

Psychosexual disorder symptoms vary for every individual and differ with gender. They may be categorized into sexual dysfunction, paraphilias and gender identity disorders. Dysfunction is a sexual problem characterized by decreased desire, arousal or orgasm and lack of enjoyment or satisfaction derived from sex.

Psychosexual disorder - Wikipedia

Gender identity disorder and transvestic fetishism youth had high rates of general behavior problems and poor peer relations. On the psychosexual measures, gender identity disorder patients had considerably greater cross-gender behavior and gender dysphoria than did transvestic fetishism youth and other control youth.
