Gram Positive Bacilli Identification Flowchart Negative ...

Fermentation analysis is a common step for both Gram-positive and Gram-negative bacteria identification. Add another line and shape to the flowchart. This step represents a test for coagulation, a biochemical test called coagulase.

Gram Positive Cocci Flow Chart Identification Flowcharts ...

Simplified Flow Chart for Identification of Gram-Negative Rods Most gram-positive organisms cannot grow on MacConkeys. Lactose Fermenters (LF) show colonies that are pink or red, Non-Lactose Fermenters (NLF) are colorless.

Gram Negative Rods Identification Flow Chart ...

This chapter emphasizes that the Gram stain (performed on 24- to 48-h-old colonies from rich media) and macroscopic morphologies are initial key features for the differentiation of aerobic gram-positive rods. All strains of aerobic gram-positive rods (except the non-rapidly growing mycobacteria) are initially grown on blood agar plates.
