Sustainable design is  
about building the  
future, not just a  
structure.

Sustainability is as

# File Type PDF Green Building And Sustainable Development

much about process as it is about product. Seeing sustainable design as a process empowers “green” designers to better evaluate and anticipate the environmental, economical and social impacts and costs of building products.

Green Building  
And Sustainable  
**Ordinance for ...**

Though the words  
“green” and  
“sustainable” are often  
used interchangeably,  
there are several  
differences between  
them, meaning that a  
“green” building is not  
always “sustainable.” A  
building is green when  
it helps reduce the  
footprint it leaves on  
the natural  
environment and on  
the health of its  
inhabitants.
