Tinnitus Evaluation and Management Considerations for ...

The resultant traumatic brain injury (TBI) usually needs a multidisciplinary approach of management. Although computed tomographic (CT) head scan is generally a preferred investigation in TBI, however, clear guidelines are required to help decision making by different team members on "when a head CT scan is needed", its limitations, and "when it is likely to be informative".

Head Injury: A Multidisciplinary Approach (Cambridge ...

The fact that Head Injury: A Multidisciplinary Approach was penned by an (almost) all-England team does not matter. Traumatic brain injury (TBI) is TBI is TBI the world over. Head Injury was my earliest summer read and so good that I enjoyed it in the garden outside my flat. It was a page-turner from line one, and I quickly got used to the program of ischaemia, oedema, haemorrhage, and so forth.
