A lot of owners find that the panels are too tall but not wide enough. The simple fix is to cut the top off so the height is correct and use the cut off piece to add to the width. It's a little extra work but does the job without sacrificing efficiency. Another issue is that the included adhesive squares aren't the most durable.

I have a heil sp80 and the fan inside the house won't kick on with AC on. The unit outside fan does kick on. I noticed the line also frosted so i think the compressor kicked on. The blower inside the house does kick on when I turn on system heat. There was a breaker kicked when I discovered ac wasn't working. Any help
