Hook Loop N Lock Create

The original hook-and-loop fastener was conceived in 1941 by Swiss engineer George de Mestral. The idea came to him one day after returning from a hunting trip with his dog in the Alps.He took a close look at the burs of burdock that kept sticking to his clothes and his dog's fur. He examined them under a microscope, and noted their hundreds of "hooks" that caught on anything with a loop, such ...

Start by inserting 2 fingers into the padlock's shackle loop and pull up on the shackle to create tension. Then, tap the side of the lock that contains the fixed end of the shackle with a hammer using quick, short strikes. Avoid hitting the lock with your full strength since the consistent tapping is what breaks it open, not brute force.
