Impact of backcountry recreationists on the water quality ...

Backcountry recreationists use the park road as a common launching point into the backcountry and can start their trip from anywhere – with the exception of temporary wildlife closures – along the park road. Recreationists are in the backcountry once they are at least ½ mile outside of the park road corridor.

Impacts - Default | Montana State University

I have not dwelled on the social impact that mountain biking can have on other recreationists because this is ambiguous at best. Mountain bikers are viewed more favorably than say motorized recreationists, though with the growing popularity and speed of electric mountain bikes that distinction may soon be reduced.
