Weebly - Introduction

The transmission of sound is how the vibration created by a sound source is transported to our ears. Velocity is the speed of sound travelled per unit time. Let's find out how transmission and velocity work hand in hand.

PHYCS 107: Chapter 4 Sound - Weebly

INTRODUCTION. The understanding of sound is a vital component towards our experience of the built environment. Architects/Designers generally design visually, accentuating more on the visual aspect; the sight and pay little attention to the role of sound as a design inspiration.

Show What You Know - How Instruments Make Sound

Sound-wise, there are many characteristics of the clarinet that makes it distinct from other instruments. First of all, the clarinet's sound is created by the vibration of the reed, which makes it a woodwind instrument, and therefore have a different sound compared to the brass, strings or percussion section, because of the difference in the sound's origins.

INTRODUCTION - khairinakhalid.weebly.com

The sound in this trailer is very engaging to the audience. I really like the dialogue at the beginning playing over the quiet drone. The mode of address of the drone is fearful and quiet. I think the sound in this trailer is the most important part as you must listen carefully to get the full satisfaction.

INTRODUCTION - Light & sound Webquest - Weebly

Metre: Starts in 7/4 but lots of changes of metre - 4/4, 3/4, 5/4, before it settles in 7/4. Also includes 4 bars of silence. Tempo: fairly slow (crotchet = 80 means 80 beats per minute). Long notes and silence give a feeling of no fixed tempo or metre. Pitch: Generally very high especially Piccolo, Crotales and Piano. (15ma and 8ve) Timbre: Shrill sound of crotales and v. high piano note ...
