## 2. SURFACES

Definition. A subset  $S$  of  $\mathbb{R}^3$  is a regular surface if, for each point  $p \in S$ , there is an open neighborhood  $V$  of  $p$  in  $\mathbb{R}^3$ , an open set  $U \subset \mathbb{R}^2$  and a map  $X: U \rightarrow V \subset \mathbb{R}^3$ , such that (1)  $X$  is smooth, meaning that if we write  $X(u, v) = (x(u, v), y(u, v), z(u, v))$ ,
