4.1 Logic Programming. Logic programming, particularly represented by the language Prolog (Colmerauer et al. 1973), is probably the most important and widespread application of automated theorem proving. During the early 1970s, it was discovered that logic could be used as a programming language (Kowalski 1974).

Boolean satisfiability problem - Wikipedia

Hi very good tutorial :D keep up the good work you helped me alot :) i was wondering (if there wasnt any previous sessions opened) how do i use this table so it will show at my website (like linking php and sql or something like that :) sorry for the stupid question but im just learning sql and php...oh and allso could it be possible to use php in a html website (so you can include some php ...
