Lesbian Health in the Context of Society . Historically, lesbians have been the target of prejudice and discrimination, both public and private, and the stigmatization of homosexuality remains widespread in our society (APA, 1997; Perrin, 1996). Although many kinds of abuse of and discrimination against lesbians have been clearly documented, their impact on physical and mental health remains in ...

Introduction Social determinants of health (SDoH) is a relatively new term in health care. As defined by the World Health Organization (WHO), SDoH are "the conditions in which people are born, grow, live, work and age. These circumstances are shaped by the distribution of money, power and resources at global, national and local levels" [...]

Lesbian health inequalities: a cultural minority issue for ...

Lesbian Health takes a frank look at the political pressures, community attitudes, and professional concerns uniquely affecting the study of lesbian health issues. The book explores many other issues including the potential for transferring findings in this field to other population groups, including other rare populations and women in general.

Clinical Trials 101: A Beginner's Guide | Everyday Health

Many professionals within our healthcare system maintain a position that lesbian health is synonymous with women's health, secure in their belief that it is unnecessary to identify women as lesbian or bisexual within a consultation. Indeed, some well-meaning providers regard enquiry about lesbianism as overly intrusive and to be actively avoided.¹ However, being part of a minority sexuality ...
