### **Steve Olson - Wikipedia**

In a journey across four continents, acclaimed science writer Steve Olson traces the origins of modern humans and the migrations of our ancestors throughout the world over the past 150,000 years. Like Jared Diamond's *Guns, Germs and Steel*, *Mapping Human History* is a groundbreaking synthesis of science and history.

### **World Maps: Races of the World - Ciao Bella Bella**

*Mapping Human History* discusses how the use of mitochondrial DNA and Y chromosomal DNA can be used to trace the common origins of humans. Steve builds a case for how humans appeared as a distinct group about 150,000 to 200,000 years ago based on genetic variation we see in people today.

### **Mapping human history genes race and our common origins pdf**

The relationship between race and genetics is relevant to the controversy concerning race classification. In everyday life, many societies classify populations into groups based on phenotypical traits and impressions of probable geographic ancestry and cultural identity—these are the groups usually called "races" in countries like the United States, Brazil, and South Africa.
