The NASTRAN structural analysis system is the most widely used structural analysis tool in the country. More capabilities are continually being added to the system, making it the most comprehensive as well. In order that many new users can determine how to use the program quickly, this user's guide was considered an essential addition to the ...

MSC Nastran - Multidisciplinary Structural Analysis

The largest addition to SOL 600 for MSC Nastran 2008 r1 is the addition of a capability to support very large grid and element IDs. Up to 10-digit IDs may now be used for grids and elements when SOL 600 is used, however to be compatible with other solution sequences, IDs should not normally exceed a value of 99999999. Large IDs may be specified separately for grids, elements, or both items.
