Zeno's Paradoxes | Internet Encyclopedia of Philosophy
Defining Interest. The term interest can describe two distinct (though often co-occurring) experiences: an individual's momentary experience of being captivated by an object as well as more lasting feelings that the object is enjoyable and worth further exploration. Interest is, therefore, both a psychological state characterized by increased attention, effort, and affect, experienced in a ...

Thomas Kuhn (Stanford Encyclopedia of Philosophy)
More generally, (CN) and kindred principles might be thought to rest on a conception of causality that is now obsolete, finding no place in modern physics (for further discussion, see the metaphysics of causation, §2). But the next three versions of the problem can arise even for those who reject the need for a causal nexus.

Lean manufacturing - Wikipedia
According to classical physics a particle could possess any energy in a continuous range and if it changes energy it does so in a continuous fashion, possessing at some point in time every energy between the initial and final energy states. Modern quantum theory denies both these classical principles.
