Mitsubishi Tech: Solving the 3.0l V6 Idle Problem

Once dry and set carefully re-screw it back into the throttle body and adjust the idle speed to 800 RPM. There is a small O ring on this screw to seal it, so if there is any possibility of this O ring leaking just squeeze in a small amount of silicone sealant into the hole on top of it to seal it.

How to Fix an Engine High Idle in Under 15 Minutes

As for the steps you need not worry about 2 and 3 (11 turns must be a mistake anyway. It is to set the throttle opening roughly to idle setting and 11/2 to 2 turns will do) since the car must be idling fine now. But if the idle speed increases while you adjust A/F you can back it off a bit. After Step 1 note the current idle speed.

Found out it was fuel pressure loss that caused the long cranks after sitting and odd idling. Didn't cost anything to fix!

Mitsubishi Outlander Engine idle speed is high Inspection

...

Your Mitsubishi's IAC (Idle Air Control) valve can become dirty and clogged over time. If your Mitsubishi stalls frequently or begins to have a strange idle, it's time to clean the IAC valve. A dirty IAC valve cannot control the engine's idle speed very efficiently--hence the poor idle and frequent stalling.
