### **meaning - At Night or In the Night? - English Language ...**

With the exception of the Megalopta, almost all bees are inactive at night. However, the queen bee does lay eggs day and night in April and May. While the bees don't go to sleep, they are motionless, which retains their energy for the following day. As with wasps, if you need to get rid of the bee's nest, nighttime is the best time to do it.
