Factors affecting the production of *Trichoderma harzianum* ...

A *Trichoderma harzianum* strain, isolated from composted hardwood bark in Western Australia, was found to produce a metabolite with antifungal and plant growth promoting activity. The structure and absolute configuration of the fungal compound, harzianic acid (1), were determined by X-ray diffraction studies. Harzianic acid showed antibiotic activity against *Pythium irregulare*, *Sclerotinia* ...
