### Plant Protection in Greenhouses - Fogging and Ultra Low Volume

Managing Pests In Small Greenhouses By Colleen Armstrong Over the past 30 years, I've managed all kinds of greenhouses and a common characteristic has been their modest size — smaller or equal to 2,500 sq.ft. Insect problems can be challenging because a grower can experience multiple pest problems in close proximity to one another and at the same time.

### Plant Protection Managing Greenhouse Insect And Mite Pests

Greenhouse Insect and Mite Pest Management Insect and Mite Pests of Greenhouses Mealybugs. Mealybugs are small, sluggish insects, about 1/8-inch long (See Figure 23.13). Mealybugs are covered with a white, waxy powder with threadlike projections around their perimeter. This waxy powder serves as protection from chemical pesticide applications.
