Nesquik Breakfast Cereal | Nestlé Global

The values given for cereal to produce 1 kg of meat seem to be unrealistic. Not only cereals, but also food industry by-products are fed to animals. We can produce 1 kg of beef (cattle) without any cereal and only roughage, whereas in the case of broiler chicken meat, more than 1 kg (not only cereals) is required.

Food Security: The Challenge of Feeding 9 Billion People

Overall, agrobiodiversity and farming intensity had equal net contributions to cereal crop yields, while heterogeneity of the crop mosaic enhanced biodiversity. In 2017, neither higher farming intensity nor agrobiodiversity and ecological functions could lift cereal production, which suffered from unfavourable meteorological conditions.

Farming intensity indirectly reduces crop yield through ...

For example, economics students learn how to think about the way all markets work and the principles that guide them. In contrast, a marketing class might study how a cereal company figured out the demand for its product through a detailed case study. If cereal companies are hiring that year, those particular marketing majors might get the job ...
