ABB S4Cplus Controller - ICR Services

The ABB S4C is the replacement of the S4 controller, but was created to be smaller and lower as the "C" represents compact. The majority of the computer system stayed the same with a few updates to the hardware and software. It is a self-optimizing controller that offers extraordinary user-adaptability, performance, and reliability with a fast boot up time and minimal downtime.

RIVERSIDE HYDRONICS TEMPTRAC SERVICE & SETUP MANUAL Pdf ...

The S4C controller is a further development of the S4, the "C" stands for compact and indeed this type of controller is substantially smaller and lower than the S4. Although much of the computer system remained the same some updates were made to both hardware and software, especially on the later M98 S4C.
