Solving equations & inequalities | Algebra I | Math | Khan ...

In this section, you will learn about three different ways in which to write down sets of solutions. The Real Number Line. The most intuitive way is to use the real number line. If we draw a line, designate a point on the line to be zero, and choose a scale, then every point on the line corresponds uniquely to a real number, and vice versa:

The "forget the minus sign" definition of the absolute value is useless for our purposes. Instead, we will mostly use the geometric definition of the absolute value:

Absolute Value Inequalities - S.O.S. Mathematics

In this unit, we learn how to solve linear equations and inequalities that contain a single variable. For example, we'll solve equations like $2(x+3)=(4x-1)/2+7$ and inequalities like $5x-2\geq 2(x-1)$.
