There are a few paid-for books though, and there's no way to separate the two

Standard wet liner inline-four engine - Wikipedia

Problem is Bob with the old 23C Engine you have to lift crank out through flywheel end of the block So stand block on end fasten lifting eye onto flywheel mounts then lift out with engine crane. (sighs) You therefore have to get pistons and rods out before you can remove the crankshaft. (Photo from service manual)

The only thing that I can offer is that the valve lift is .330" (8.38mm) It should be possible to accurately make ...

Massey Ferguson 35 Engine Rebuild Kits - Antique Tractors

As anyone who read my last post will know ive bought a 4yl 35. While it is in bits i am tempted to replace the timing chain to rule this out of any starting issues that may arise when i get it running. What is a good way of telling that the chain needs replacement? On looking though the fuel pump window at the timing marks, the appropriate timing letter is a good few mm away from where it ...
