If you are prepared to reduce the soil support to a simple "modulus of subgrade reaction", thereby inducing apoplexy in all geotechnical engineers, you can model just the concrete, using plate or brick elements as appropriate. You can then take advantage of Strand7's "face support" attribute to represent the Winkler support from the soil.

The Strand7 API Manual covers the functionality available to programmers wishing to leverage the power of Strand7 to develop new applications. The Strand7 API module is available as an addition to the Strand7 base package. The manual - presents a complete listing of all Strand7 function calls available through the API.

Strand7 - Using Strand7 Manual

The Strand7 Theoretical manual aims to provide Strand7 users with relevant theoretical information about the finite element method as it applies to Strand7. It is not intended to be a comprehensive review of the finite element method.
