Globulin Test: MedlinePlus Medical Test

Etymology []. Despite the name fisher, the animal is not known to eat fish. The name comes from colonial Dutch *fisse* or *visse* due to its resemblance to the European polecat (*Mustela putorius*). In the French language, the pelt of a polecat is also called *fiche* or *fichet*. [5] In some regions, the fisher is known as a *pekan*, derived from its name in the Abenaki language.
