Pharmacology, Physiology and Neuroscience Our mission is to provide expert instruction and conduct innovative research in neuroscience, physiology and pharmacology. Our faculty members teach students of medicine, nurse anesthesia, physician assistants and biomedical science in the classroom and the laboratory.

### The Physiology Of Truth Neuroscience

The Physiology of Truth...is not an essay on physiology, epistemology or semantics, but a tour de force covering selected chapters in neuroscience and their philosophical underpinning, colored by the author's interpretation of the interaction of phylogenesis, ontogenesis and epigenesis. The binding theme is the relationship of knowledge encoded in our brain with the world at large.

### The Physiology of Truth — Jean-Pierre Changeux | Harvard ...

Neuroscience is the study of how the nervous systems develops, its structure and what it does. The most fundamental property of the brain is connectivity. Canadian psychologist Hebb (Hebb, 1949): "Neurons that fire together, wire together" (Löwel 1992), that associated activity creates inter-connection amongst single and groups of neurons.
