Jupiter (mythology) - Wikipedia

All of the planets, except for Earth, were named after Roman gods and goddesses. Jupiter, Saturn, Mars, Venus and Mercury were given their names thousands of years ago. Those were the planets that the ancient Romans could see in the sky without a telescope.

The Planet Gods Myths And

A lyrical, poetic text explores the features of the planets and compares them to the gods of old who are their namesakes. Though many of the planets were named long before we had good scientific information about them, Mitton draws readers attention to some amazing coincidences. The veiled goddess Venus lends her name to a cloud-shrouded planet. The blue, stormy planet Neptune is named for the god of the sea. The Planet Gods brings together for the first time the myths and truths of space ...

Mythology of the Planets - Universe Today

In classical Roman mythology, Neptune is the god of the sea, and the deep, ocean blue color of the planet Neptune reflects this. Its glyph is taken directly from Neptune's trident, symbolizing the curve of spirit being pierced by the cross of matter.

Mythology of the Planets

According to Greek mythology, the first god was Chaos. While the word Chaos brings certain images of mayhem and disorderliness to the English-speaking mind, the Greek god Chaos was just a big, empty, black, Nothing. Chaos was Nothingness, the Void, or empty space. After Chaos, the goddess Earth appeared.

Planets in astrology - Wikipedia

By the eternal accuracy of their motion, the planets reveal they are themselves gods, each planet regulating its own motion with divine intelligence and repeating it eternally to evidence its own wisdom. The astrological religion first advocated in the Epinomis gradually evolved into the highest religion in the pagan world. The old gods were still worshipped, but their mythological adventures were increasingly seen as childish and immoral; thinking people considered astrology highly rational ...

The Planet Gods : Myths and Facts About the Solar System ...

The Planets: Representatives of the Gods. This is pretty common information and basic to mythology, but for anyone who doesn't know, this is the relation the planets of our solar system have to Greek Mythology. The planets are named after the Roman counterparts of the Greek gods, so I've made reference to who they are in Greek mythology.

Myths about Planets - Windows to the Universe

On Mars, there is also the Olympus Mons, the largest volcano of the planet, referring to Mount Olympus or Olympos in Greek, the mountain of the gods in the Greek mythology. Planet Venus also has its volcano, named Rhea Mons, after Rhea or Rea, the mother of Zeus, daughter of Uranus and Gaia.

The Planet Gods: Myths and Facts About the Solar System by ...

Mercury (Hermes) is the god of commerce, travel and thievery in Roman mythology. The planet probably received this name because it moves so quickly across the sky. Venus (Aphrodite) is the Roman goddess of love and beauty. The planet is aptly named since it makes a beautiful sight in the sky, with only the Sun and the Moon being brighter.

Ancient Rome, How the planets got their names, for Kids ...

In Ancient Greek Mythology, nectar is the drink of gods and goddesses who lived on Mount Olympus, the mythical home of many of the deities. The stories explain that Ancient Greek deities ate ambrosia and drank nectar with it, as their nourishment. The nectar of the gods was a drink with magical properties. Not only [...]
