2 Voice over LTE (VoLTE) In the last three years, carriers have begun rolling out "Voice over LTE" technology. This allows phones to make calls entirely over the 4G LTE network, without ever connecting on the older 2G and 3G networks. Different carriers are at different stages of this roll-out: AT&T has rolled out Voice over LTE across

Voice Over Lte Volte It dynamically manages and controls data sessions, enables new business models. Apart from this, PCRF LTE also has the functionality to make it easy for other devices out of the 3GPP network- like WiFi or fixed broadband devices- to access the 4G LTE network. In
