Woody Ornamental And Landscape Plant
Woody ornamental plants are the living, structural components of a well-landscaped yard. They are long-lived perennials with stems and branches that increase in girth and height each growing season. Unlike herbaceous plants that die back to the ground in winter, woody ornamentals remain aboveground year-round. In the landscape, woody ornamentals serve many essential functions.

The plant prefers full sun to part shade and doesn't mind clay soils, though it does perform best in moist, well-drained dirt. This plant can grow to be very large, but many gardeners like to keep it pruned to a smaller shrub size. Extract of the plant's leaves, twigs, and bark is used in the cosmetics industry as an astringent.
